New York, New York

Dear Irv,

This note of congratulations and appreciation is a bit delayed, but your show has been a constant topic of conversation since it was aired. The concept was great and the execution was perfect. Those of us who have been saying these things to each other for some time now were genuinely thrilled to see it done on network television.

Not only that, to see it done so completely, so honestly, and so competently was truly astounding. We really kept waiting for the cop-out but it never came. The show kept getting stronger.

The entire series was really exceptional and should be distributed to all departments of community medicine and dentistry at medical schools and dental schools across the country, as well as public health and undergraduate health courses.

Again, my congratulations and thanks.

Sincerely,

Dick

It was the best thing on the tube since Sweet Sidney.
